Cisco WebEx Meetings as a Service

Create a collaborative and productive online meeting experience

Improve Collaboration and Significantly Reduce Operational Costs

The workspace has transformed significantly with increased geographic dispersion and mobility, imposing more flexible work schedules and increased emphasis on workforce productivity. The need also to provide employees, customers and partners with integrated, easy to use collaboration tools is driving organisations to adapt communication strategies that are both affordable and future proof.

People now want to connect from any location, at any time, with a broadening array of devices and applications. Rising travel costs and time spent in meetings has driven the demand for an alternative to face-to-face meetings. By providing a highly secure, centralised online space for organising and sharing all meeting-related activities and information, organisations can benefit from reduced costs and increased productivity.

“ Accelerate business results by making online meetings more productive. ”

WebEx Meetings is a software as a service (SaaS) solution delivered through the Cisco WebEx Cloud; a highly available and secure service delivery platform with unmatched performance, integration flexibility, and enterprise-grade security.

WebEx Meetings accelerates business results by making web meetings more productive. This people-centric collaboration solution can enable team members to easily share information through any computer or mobile device. WebEx Meetings allows people to attend meetings any time, from anywhere, inside and outside corporate firewalls.

Service Benefits

Cisco WebEx Meetings is a cost-effective alternative to face-to-face meetings. It offers a scalable architecture, consistent availability and multilayer security:

- Boost meeting effectiveness and improve productivity

- Improves budgeting and controls costs

- Rich web meeting experience with video, integrated audio, real time content sharing

- Security enforcement with strict policy and access controls built into the Cisco WebEx Cloud

- Reliability and performance with highly secure data centres, dedicated, high-bandwidth fiber, to eliminate lag time and interruptions.

Features and Benefits

Teams can collaborate more effectively with a virtual meeting incorporating audio, high-definition (HD) video, and real-time content sharing. WebEx Meetings also helps reduce email clutter and streamline the entire meeting process by providing a highly secure, centralised online space for organising and sharing all meeting-related activities and information.

Feature	Details
Document, Application, and Desktop Sharing	Share with remote attendees in real-time. Pass control to attendees so they can share their desktops, or annotate yours.
Persistent, Centralised Meeting Spaces	Crisp and clear HD video of the Active Speaker with up to 720p screen resolution. See up to seven simultaneous webcam video feeds with voice-activated switching.
HD Video	Identify who is speaking by a flashing icon in the meeting participant panel.
Active Speaker	Manage files in folders, with version control, comments and indexed searches for all content
Document Library and File Sharing	Record meetings and applications for future reference, training or demos.
Meeting Recording and Playback	Initiate meetings instantly from Microsoft Office, Microsoft Outlook and a variety of instant messaging (IM) solutions.
Desktop Integration	Initiate meetings instantly from Microsoft Office, Microsoft Outlook, and a variety of instant messaging (IM) solutions.
Mobile Meetings	Attend meetings on an iPhone, Android, iPad, and other wireless or 3G mobile phone and tablet devices.
Data Privacy and Security Safeguards	A variety of security options - from meeting password protection, through strict network and data centre security to ensure the highest levels of privacy and data integrity.
