

Cisco Service

Contract Consolidation

Always Optimised

Many organisations will have a large Cisco installed base, with multiple architectures, numerous support contracts with multiple partners, and products that may be nearing end of life, all putting their business at increased risk.

Logicalis UK can provide a free-of-charge assessment to help your business consolidate contracts, reduce support costs, simplify the number of support contracts, and ensure your estate is fully covered at a time when the network has never been so important.

We are here to help advise and ensure your critical business infrastructure is fully optimised and capable of meeting the demands of an agile business environment.
