

Cisco DNAC: Improved Network Assurance

Do you have a DNAC appliance, but have yet to deploy it?

Logicalis UK has created a rapid, remotely configured, DNAC deployment service, working with Cisco and our service partners, to provide the scale you need.

Let's discuss your current environment and what entitlements you have, and we can then advise on how you can improve core network services operating through these challenging times.

We want to help you adopt the Cisco DNAC appliance and software, giving you higher levels of network assurance, reliability and troubleshooting.
