

# Remote Worker

# Solutions and MSS

In these uncertain times, you need to ensure Remote Access solutions are sized and configured properly, to allow your workforce to operate remotely and minimize the impact in the business continuity plan. Firewall/VPN configuration and Multiple Factor Authentication (MFA) are also crucial in sustaining a secure mobile workforce.

We want to ensure our customers can keep their workforce working in a secure way, so Logicalis UK are currently offering a free review and assessment to:

- Provide immediate feedback on where you might have issues
- Ensure secure platforms are configured and sized properly
- Any additional security controls can be integrated accordingly as part of a security architecture
