

COVID-19 Customer Continuity Response

Logicalis UK is mobilising our specialist teams to provide assistance to our customers, to deal with a range of challenges they may face over the coming months. To ensure we can deal with your specific needs, we have defined a number of key areas we can support you in.

Networking and Security

Remote Worker Access at Scale

Examine existing configurations and policies, anticipated workload, risks, and monitoring. Free advisory and adoption planning for Cisco VPN offers.

Remote Worker Security

Ensure that appropriate security measures are in place to support a highly remote workforce. Free advisory and adoption planning for Cisco security offers.

Collaboration Preparedness

For remote users and a range of remote worker and collaboration-as-a-service rapid deploy services: Office365, Citrix Cloud Desktop and Cisco Collaboration.

Security Incident Response and Managed Security Services

Support you in responding to a range of security incidents and provide augmented staff support for your security infrastructure.

SD-WAN Overlay Services

Provide Rapid operational overlay on existing SD-WAN ready infrastructure.

Network Identify and Assurance Services

Rapid and remote deployment of Cisco ISE and DNAC assurance tools to improve network security and fault troubleshooting and resolution.

Secure File Transfer

Deployment of IBM free offer on enterprise grade secure file transfer technology.

Business Critical Application and Resource Capacity

Business Critical Application Monitoring

Provide a rapid deploy business critical application monitoring service to help ensure performance and aid in troubleshooting.

Data Centre and Cloud Resource Recovery

Help you mitigate capacity constraints of internal or cloud resources, due to delayed expansion projects or cloud service provider restrictions.

Cloud Storage Expansion

Help you easily extend on sit enterprise storage into public cloud providers, to free up internal resource for critical applications.

Business Planning and Analytics Support

Business Planning and Modelling

Rapid stand-up of business planning and analytics tools and methodologies, and support in loading data and pre-built dashboards.

Planning Analytics Shadow Finance Modelling

Our team of finance planning experts can mobilise to help your finance team model, to give you the insights you need to operate your business over the next few months.

Enhanced Cognos Analytics

Enable our customers to take advantage of the IBM 3-month free-of-charge upgrade to Enhanced Cognos licensing and advanced analytics.

Cisco Support Coverage and Contract Support

Cisco Support Coverage Assessment

A free-of-charge assessment to help our customers consolidate contracts, reduce support costs, simplify the number of support contracts, and ensure our customer's estate is fully covered at a time when the network has never been so important to business operations.

Cisco Service First Contract

With no obligation, Logicalis UK specialists can review your current support landscape and help to advise and ensure that your critical infrastructure is fully optimised and capable of meeting the demands of an agile business environment.

We are here to support you
