

10 Good Reasons for Azure NetApp Files

Although the cloud journey is well underway and continues to mature rapidly in this period of digital transformation, with 65% of enterprise workloads still being on-premises—and nearly half of these workloads based on file data—there is clearly still a need for advanced services in the public cloud.

Building on a two-decade relationship, Microsoft and NetApp created Azure NetApp Files, a Microsoft Azure native cloud service that delivers a seamless method to deploy and manage enterprise-class file-based workloads in the Azure Cloud.
